

Commands taught today:

ls – list all the files and folders in the current directory
cd – change directory to the folder mentioned after the command
&& - execute two commands one after the other
rm – remove file
mkdir – make new folder
rm -r – remove the folder and all the contents inside it
cat – display the contents of a file
mv – move the file
cp – copy the file
touch – create new empty file

```
work@work: ~/Desktop/AI Internship
File Edit View Search Terminal Help
work@work:~/Desktop$ ls
'AI Internship'
work@work:~/Desktop$ cd AI\ Internship/
work@work:~/Desktop/AI Internship$ cd Day\ 1 && ls
'Course Contents (Updated).pdf'  links
work@work:~/Desktop/AI Internship/Day 1$ touch file
